

Data for initializing OvPOP

County/Township:

Year:

(Provide year wise information; add extra sheets if multiyear data is available.)

Parameter	Estimate	Guesstimate	Assumption	Reference/Comments
Pre-harvest density (deer per square mile)				
Post-harvest density (deer per square mile)				
Deer population estimate (pre/post harvest)				
Sex ratio (doe-to-buck ratio)				
Adult: yearling: fawn proportion (pre-harvest)				
Adult male harvest (% adult male harvested)				
Number of adult male deer harvested				
Adult female harvest (% adult female harvested)				
Number of adult female deer harvested				
Yearling male deer harvest (% male yearling harvested)				
Number of yearling male deer harvested				
Yearling female deer harvest (% male yearling harvested)				

OvCWD Modeling Framework

Parameter	Estimate	Guesstimate	Assumption	Reference/Comments
Number of yearling female deer harvested				
Male fawn harvest (percent male fawn harvested)				
Number of male fawns harvested				
Female fawn harvest (percent female fawn harvested)				
Number of female fawns harvested				
Number of adult male deer culled post-season				
Number of adult female deer culled post-season				
Number of yearling male deer culled post-season				
Number of yearling female deer culled post-season				
Number of male fawns culled post-season				
Number of female fawns culled post-season
